HARDY FIELD GROWN PLANTS

GIANT POLYANTHUS (Primrose)

An abundance of fascinating and colorful blooms enmassed in clusters on strong, wiry stems, lending beauty and gayety to that woodland dell, to your alpine or rock garden—indeed to any place where the plants will be cool at the roots.

Seeds (see page 11) per pkt. 25c.

Plants (see page 14), 3 for \$1.00.

SUPER SWISS GIANT PANSIES

A carefully prepared mixture, unsurpassed in every way. Blooms are of gigantic size and the most beautiful of these lovely blooms are of thick velvety texture, well waved, and crinkled at the edges. Pansies are easy to grow, and are unusually hardy and free of disease. The soil should be rich and mellow, as the pansy is a heavy feeder with a multitude of roots.

Seeds (see page 11), per pkt. 50c.

Plants (see page 14), 12 for \$1.00.

PUGET SOUND SEED CO., Inc.

In the Heart of the Seed Growing District
LA CONNER, WASH.

Twenty-sixth Annual Catalog

We believe that seed grown in the Puget Sound district has a higher vitality and quality than seed grown elsewhere. When not available, we procure the highest grade of hardy northern and western seeds grown for us by the finest seed firms in the country, in selected varieties best suited for Northwest gardens and climate.

NURSERY PLANT DEPARTMENT

There is still a very acute shortage of many items of nursery stock. Roses, Mums, Fruit Trees, in fact, almost everything that requires two seasons to produce still is feeling the effects of the manpower shortage. However, we have been fortunate in securing supplies of many of the critical items and will supply them as long as quality plants, vines, trees, etc., are available. Order early, as our present supply cannot be replenished on many varieties.

NOTE that all orders will be shipped from La Conner from our selected plants. All prices include proper packing for safe delivery and mailing charges. Be sure to include 3% sales tax—without which your order might be delayed.

WE DO URGE YOU TO BUY EARLY . . . by February, if possible, so that our mail order department will not keep you waiting.

FREE DELIVERY OF SEEDS IN U. S. A.

We deliver free, in the United States and Possessions, by Parcel Post or Express at our option, all Flower and Vegetable Seeds offered in this catalogue.

TO ORDER BY MAIL. Use the order sheet enclosed in catalogue if possible. In the space reserved for address write plainly your name, post office, nearest express office (if different from post office) and State. Keep a duplicate copy of your order for comparison.

REMITTANCES. Remittances may be made by Express Money Order, P.O. Money Order or Bank Draft; if you remit in stamps or cash, send in a Registered letter. We must decline sending goods C.O.D. unless 25 per cent of their value accompanies the order.

THIS CATALOGUE CANCELS ALL PREVIOUS ISSUES. The prices quoted in this catalogue are net and cancel all price lists previously issued. All goods are offered subject to being unsold on receipt of order and the prices quoted are subject to change without notice.

PROMPT SHIPMENT. All orders entrusted to us will be carefully filled and promptly shipped. We take every precaution to supply only seeds of the highest quality, but all goods are sold under the following non-warranty clause.

NON-WARRANTY. The Puget Sound Seed and Plant Company gives no warranty, express or implied, as to the productiveness of any seeds, bulbs or plants it sells and will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price.

POLYANTHUS PRIMROSES

PANSY PLANTS

SUPER-SWISS STRAIN. Nothing can be substituted for Pansies in your garden. They produce colorful blooms from spring to late fall, and afford a wonderful opportunity for working out color combinations, when chosen in the separate colors. To be used as ground cover for spring bulbs or for mass planting. Our Pansies are re-selections of the largest flowered types, and under favorable conditions the blossoms are 3 to 5 inches in diameter. The plants are sturdy and have good vigorous root growth. We make every effort to produce plants of the highest quality. Large plants (mixed color only). Doz. \$1.00; 25, \$1.75; 50, \$3.00.

VIOLA PLANTS

The plants are perfectly hardy and withstand drought well. They grow in the form of a dense mat of foliage about 2 to 3 inches high. Single plants form a matted clump at least 12 to 15 inches in diameter by the second season if cared for properly. The flowers are borne on strong, sturdy stems about 5 to 6 inches long. The flowers stand well above the foliage in very large quantities, forming a well kept, neat border plant which will thrive in any sunny location. As a border to small shrubs this plant is unusually attractive. If the flowers are kept picked, the plant continues to bloom profusely all season long.

PRINCE CHARMING. Color is a lively deep, plum purple, brighter towards the center. Tiny yellow eye. Flowers are very fragrant with the odor of hot-house violets, which is retained for several days indoors when picked. Price of Plants: 2 for \$1.00; 1 doz., \$5.00.

VIOLET PLANTS

SNOW PRINCESS. These giant white English Violets are similar in growth to the common long-stemmed Purple Violet, and prefer a cool moist shady location for real long stem. However, they will grow in most any location, except very dry places in full sun. An excellent plant for the north side of the house. Price: Each 35c; 2 for 60c; 6 for \$1.50.

We have just purchased one of the finest collections of both Polyanthus and Auriculas that we have ever seen.

GIANT POLYANTHUS. So called because each long, sturdy flower stem bears not a single bloom like the *Aculus soris*, but a cluster of blooms which each measure 1½ to 2 inches in diameter, when grown under special care. We have never seen larger flowers or more dazzling colors than we offer in this mixture. Plants of this type and quality usually sell for 50c to 75c each in mixture. Prices, postpaid: 3 for \$1.00; 6 for \$1.75; doz. \$3.00.

PRIMULA AURICULA. This alpine beauty has the brightest colors imaginable and while not as well known as its cousin the Giant Polyanthus, is equally striking. Each sturdy flower stem is a bouquet in itself of banded blossoms, often as large as the Giant Polyanthus. Plants do best in sharp sand or rocky soil around the roots for proper drainage. They also need plenty of moisture and partial shade during the blooming season, which usually occurs April to June and often again in the fall. Single plants: 45c each; 3 for \$1.25.

HYPERICUM MOSERIANUM (The Golden Pincushion Glower)

SAINT JOHN'S WORT. The **TRUE ROSE OF SHARON.** A grand ground cover plant. Grows only 12-15 inches high. Plants spread rapidly—are practically evergreen. Does equally well in shade or full sun. Flowers all summer. Each 35c; 3 for \$1.00.

Plant in Rich Soil

The soil in which Pansies, Violas, Violets, Primroses and Polyanthus are set out should be rich and mellow—plenty of leaf-mold—as these plants are heavy feeders, with a multitude of fine roots. We strongly advise that these plants should be given one or two applications of Miller's Booster root stimulating fertilizer to enable the plants to produce **MORE ROOTS MORE QUICKLY.**

All plants on this page are offered subject to non-delivery and refund of purchase price in case of retarded growth due to abnormal winter weather.

CANNAS — For Sunny Locations

The new Cannas with their much improved blossoms and exquisite colors make a longer show of beauty in the garden than nearly any other large flowering plant.

The roots are started into growth indoors early in the spring in pots of rich soil. When they have at least 18 to 20 inches of strong, sturdy growth the weather is usually right for them to be planted in the open garden. The growing plants should be set out about four inches deep as soon as all danger of frost is passed. They like rather deep, heavy soil that has been well enriched.

THE PRESIDENT. 4 feet. This immense new flaming scarlet has come into wider use more quickly than any other Canna. The President leads the red varieties in the quality and also the quantity of its bloom. The foliage is rich green. **Each 25c; 1 doz. \$2.50.**
